INDEX.

ABSORPTION OF GASES IN VACUUM TUBES, THE, 167
—— of ultra-violet rays, 224
Acid, Alleged formation of persilicic, 80
—— by fermentation, Citric, 218
—— fixing-baths, Further notes on, 223
——, Graphitic, 40
——, Solubility of palladium in selenic, 9
—— versus alkaline fixing-baths, 187
Adams, Lionel E., 135
Adsorption of Uranium-X by charcoal, Influence of foreign substances on the, 85
Aesthetic appreciation of animals, Prejudiced, 225
Africa, East, 200
Agassiz Association, The, 21
Agriculture and the war, 199
Alaskan earthquakes of 1899, The great, 22
Albedoes, Planetary, 162
Albinism, 225
Alkaline fixing-baths, Acid versus, 187
Alloy, The magnetic properties of the iron-cobalt, 13
Alum in the fixing-bath, Hardening action of, 127
Amoeba, The life-history of a soil, 201
Aniline dyes on proteins, Action of, 162
Animals, Prejudiced aesthetic appreciation of, 225
Antarctic, Mr. Ponting's photographs of the, 231
Ant-catching device, Woodpecker's, 168
——lion, Traps of the, 202
Anthracite, The origin of, 122
Ants, Termite-raiding, 66
——, Way-finding in, 225
Appliances, The History of laboratory heating, 193
Architecture, Climate and, 102
Ardaseer, G., 104
Asphalts, Action of light on, 59
Astrolabe a prism, The, 122
Astronomical Society, The American, 7
Astronomy and modern novelists, 29
—— Notes, 7, 39, 58, 79, 98, 120, 141, 161, 184, 198, 217, 235
Astrophiura cavellae, 7
Atmosphere at Kashmir, Remarkable "seeing" quality of the, 144
——, Ionisation in the upper layers of the, 47
——, The radiation of the, 165
Atoms, Compressibility of the, 224
Aurorae, Altitudes of, 107
Australian weather, 1914, 11

BABOONS, HIGH TONE IN, 86
Backhouse, T. W., 131
Bacteria were first seen, How, 11
Banana-skins, Potash in, 162
Barnard's quick-moving star, Professor, 218
Bath, Hardening action of alum in the fixing-, 127
Baths, Acid versus alkaline fixing-, 187
——, Further notes on acid fixing-, 223
Bees, Provisioning of the egg-cradle in solitary, 150
—— taste their food ? Do, 189
Beetle, Larvae of the Tiger, 226
Benham, C. E., 187
Bickerton, A. W., 4
Biological station, A mountain, 15
Bird, Breastbone of a gigantic, 242
——-droppings, Bugs like, 66
Birds, The encouragement of insect-eating, 71
Bladderwort, Observations on the, 238
Blood, Stores of living, 189
Bodies, The problem of the three, 58
Boulders on the Durham Coast, Scandinavian, 219
Boundary, The Peru-Bolivia, 81
Bowell, E. W., 12
Brachiopods and corals, The inorganic constituents of, 81
Bradford, S. C., 24, 193
Breastbone of a gigantic bird, 242
Breccia, Mode of formation of igneous, 81
Brooks, Albert J., 231
Bromine as a light filter, 188
Bromide prints, Clearing and removing portions of the image of, 64
Bubbles, Quartz and its mobile, 187
Bugs like bird-droppings, 66
Bulman, G. W., 133
Burke, John Butler, 53
Bursill, A., 68

CABLE, "GRIBBLES" ATTACKING SUBMARINE, 225
Cadmium vapour arc lamp, An enclosed, 128
Calcium carbonate, The crystalline forms of, 200
—— hypochlorite as a seed steriliser, 185
—— sulphide, Phosphorescent, 59
Cambridge, An Arctic flora at, 220
Canadian Meteorological Service, 201
Cancer Research, Some cytological problems raised by, 1
Carbonate, The crystalline forms of calcium, 200
Caryoborus nucleorum, 63
Carter, R. H., 31
Caterpillars, Climbing powers of cabbage, 168
Cattle, Niata, 67
Cells of the frog's skin, Pigment, 15
Centipedes, Poison of, 129
Cetacea stranded on British coasts during 1915, 129
Channels, Overflow, 9
Charcoal, Influence of foreign substances on the adsorption of Uranium-X by, 85
Charlier's memoir on the B or Helium stars, Dr., 217
Chemical constitution, Fluorescence and, 24
Chemistry, Colloid, 85
—— Notes, 8, 40, 59, 80, 99, 121, 142, 162, 185, 199, 218, 236
Cherry laurel, A fungus on, 144
Chimney-swift to same summer quarters, Return of, 15
Chimpanzee's nest, 15
Cirrus cloud observations in Victoria, 60
Citric acid by fermentation, 218
Civilisation and climate, 237
Climate and architecture, 102
—— and health, 165
——, Civilisation and, 237
—— is the best, The English, 238
—— of New Zealand, The, 41
—— of the Eastern Mediterranean, The winter, 82
Clock on the liner and in the church tower, The master, 49
Clyde and the Tweed, Relations of the, 59
Coal: A suggestion, The origin of, 133, 174
Cobalt, Electrolytic deposition of, 47
Coccididae, or scale insects, 63
Collodio-bromide emulsion for lantern slides, 84
Colloid chemistry, 85
Colloids and the radiation from radium, 13
Coloration, Protective, 129
Colour changes in the sucking fish, 172
Comet, A meteor shower from Winnecke's, 198
——, a new, 18
——, a new short-period, 39
——, Encke's, 218

684009

Comet, Halley's, 120
——, Neujmin's, 79
——, Wolf's, 142
Comets, 99
——, The periodicity of the city of, 231
Compass, Liquid, 241
Congress, The Pan-American Scientific, 165
Coral reefs and crust-movements, 121
—— ——, The glacial-control theory of, 40
Corals, The inorganic constituents of brachiopods and, 81
Correspondence, 4, 18, 130, 161, 172, 174, 189, 231
Corundum in igneous rocks, 143
Cotton-seed, The toxic principle in, 8
Cowslip, Hybrids of primrose and, 113
Crab's journey, A, 150
Crommelin, A. C. D., 7, 16, 39, 50, 56, 58, 79, 90, 98, 109, 118, 120, 139, 141, 159, 161, 184, 190, 198, 206, 217, 226, 235, 243
Crust-movements, Coral reefs and, 121
Crystal detectors, 188
—— detectors, Theory of, 202
—— structure of thorite, 167
Crystalline forms of calcium carbonate, The, 200
Cuckoo, Legend of the young, 150

DANUBE, THE FLOATING REED-FEN OF THE, 186
Davison, Charles, 22
Daylight, Artificial, 13
Death, New experiments on feigning, 150
Denning, W. F., 26, 38
Deposits in Colorado, Eocene glacial, 81
Detectors, Theory of crystal, 202
Development, Influence of temperature on rate of, 225
Developers, Sodium sulphite in developers, 166
Diamond, The genesis of the, 164
Diet, Minimum, 202
Digger-wasp, Study of a, 168
Disgorgement, Reflex, 149
Dixon, Charles C., 172
Dogs, Sense of smell in, 129
Domes, Volcanic, 219
Drew, Aubrey H., 1
Drift problems in optics, 65
—— problems, Recent work on, 65
Dunes, Sand-ripples and, 100
Dyes on proteins, Action of aniline, 163

EARTH, THE MAPPING OF THE, 199
Earthquakes of 1899, The great Alaskan, 22
Earthworm that squirts, An, 86
Eclipse of February 3rd, The total, 59
—— of last February, The total solar, 141
Egg-cradle in solitary bees, Provisioning of the, 150
Eggs, Fishes carrying their, 225
——? Why do potato-beetles hide their, 129
Electric lamp, A new, 47
Electric sparks, Ignition of gases by, 202
Electro-chemistry of Radium-G, 66
—— -magnetic vacuum balance, 85
Elements gold-uranium, The high-frequency spectra of the, 149
——, Isotopic, 128
Ellis, David, 73, 130
Emulsion for lantern slides, Collodio-bromide, 84
Encke's Comet, 218
Engineering, Application of polarised light to, 224
Enlarging without a lens, 223
Enock, The late Mr. Frederic, 124
Eocene glacial deposits in Colorado, 81
Ermine, The stoat or, 86
Eros, Light-variation of, 39
Expedition, The Shackleton, 150
Extinction of species, 66
Evolution, The trend of, 202
Eye, Size of the pupil of the, 161

FAUNA OF JORDAN SYSTEM AND LAKE OF TIBERIAS, 189
Faraday's manuscripts, 47
Father-lasher, Habits of, 129
Fermentation, Citric acid by, 218
Filaments, Experiments with glow-lamp, 85
Filter, Bromine as a light, 188
—— paper, Manufacture of chemical, 185
Fireball, A remarkable, 7
Fire-beetle, Australian, 14
Fish, Colour changes in the sucking, 172
Fishes carrying their eggs, 225
——, Physiology of migration of, 130
Flame, Stroboscopic method of determining the velocity of a, 85
Flanders, Audibility of gun-firing in, 164
Flea-bite, A, 14
Fleck, Alexander, 13, 47, 66, 85, 107, 128, 149, 167, 188, 224, 242
Flies, Gregarious habit of hibernating, 15
Floods in Holland, 82
Flora, A new addition to the British, 212
—— at Cambridge, An arctic, 220
Fluorescence and chemical constitution, 24
Fluor-spar, 101
Fodder in Germany, Yeast as, 100
Fog, Curious appearance due to, 41
——, Removal of, 201
Folklore, Weather, 135
Fossil fungi, The, 73, 130
Fossil micro-organisms, 40
—— otoliths, 177, 203
Fowl-mite attacking man, 189
Freshwater, Thomas E., 42
Frogs and toads, Interesting, 108
Frog's skin, Pigment cells of the, 15
Fruit, Oil from the kernels of stone, 219
Fungi for rodents, Some observations on the edibility of, 93
——, Notes on some parasitic, 165
——, Some parasitic, 124
——, The fossil, 73, 130
Fungus on cherry laurel, A, 144

GALLIUM, PHYSICAL PROPERTIES OF, 149
Garnett, C. Stevenson, 174
Gases by electric sparks, Ignition of, 202
—— in vacuum tubes, The absorption of, 167
Gas-filled tungsten glow lamps, 66
Gas molecules, Reflexion of, 12
Gaslight papers with pyro, Developing, 148
Gegenschein, The, 131
Geiger-Nuttall relation, The exponential law and the, 13
Geography notes, 9, 40, 59, 81, 100, 121, 163, 186, 199, 219, 237
Geology Notes, 9, 40, 60, 81, 101, 122, 143, 163, 186, 200, 219, 237
—— of Mesopotamia, The, 143
Germany, New sources of oil in, 236
——, Utilisation of kitchen refuse in, 80
Gibbons, White-handed, 66
Glacial-control theory of coral reefs, The, 40
Globe in 1911, The meteorology of the, 123
Glow-lamp filaments, Experiments with, 85
Gneiss in Ireland, A composite, 143
Gold on the Witwatersrand, The origin of the, 163
—— -uranium, The high-frequency spectra of the elements, 149
Gravitation, 79
—— as affected by temperature, The Newtonian constant of, 47
Gravity at sea, A new method of determining, 127
Greenland Ice-cap, The, 9
"Gribbles" attacking submarine cable, 225
Grove, W. B., 147
Guinea-pigs, The home of, 242
Gun-firing in Flanders, Audibility of, 164
Guns, The sound of the, 232

HABITATS, STRANGE, 48
Habits, Formation of, 67
Hail in Maryland, Remarkable fall of, 123
Halley's Comet, 120
Hastings, Somerville, 93
Health, Climate and, 165
Helium stars, Dr. Charlier's memoir on the B or, 217
Highfield, E. G., 113
Holland, Floods in, 82
Honey-bee, Taste and smell in the, 147
Hottest region in the United States, The, 102
Hybrids of primrose and cowslip, 113
Hydrogen, A compound of polonium and, 107
——, Effect of α rays on, 224
—— molecules and the formation of H_3, The ionisation and dissociation of, 149
Hydrogen on the magnetic properties of palladium, Effect of absorbed, 202
Hypo-alum toning method, The, 147
Hypochlorite as a seed-steriliser, Calcium, 185

ICE-CAP, THE GREENLAND, 9
Iceland and India, The great lava plateaux of, 237
Illumination of the deep sea, 86
Implements on the stages of man's progress, The bearing of early stone, 153
Incas, Embalming agents used by the, 142
Incubation in pigeons, Prolonged, 15

Index, Lens and drop method of measuring refractive, 13
India, The great lava plateaux of Iceland and, 237
——, Zoölogical survey of, 225
Inheritance, The inertia of, 189
Ink, Permanence of writing, 142
Insect-eating birds, The encouragemen of, 71
Insects at lighthouses, 48
——, Coccididae, or scale, 63
——, Tidal Zone, 202
Instrument, A simple line-dividing, 68
Iodine ions in solution, A method of exhibiting the velocity of, 128
Ionisation and dissociation of hydrogen molecules and the formation of H_3, 149
—— in the upper layers of the atmosphere, 47
Ionium, Atomic weight of, 149
——, Thorium and, 242
Iron ores of Newfoundland, Oölitic, 10
——, The effect of vacuum fusion of the magnetic properties of, 202
—— cobalt alloy, The magnetic properties of the, 13
Isotopes, Physical properties of, 85
Isotopic elements, 128

JORDAN SYSTEM AND LAKE OF TIBERIAS, FAUNA OF, 189
Jupiter's satellites, Mutual occultations of, 99
Jurassic plants of Yorkshire, The, 164

KARAKORAM, TRIANGULATION IN THE, 237
Kinematograph under the sea, The, 21

LABORATORY HEATING APPLIANCES, THE HISTORY OF, 193
Lakes, Geological history of the, 60
Lamb, Nutritive value of mutton and, 199
Lamp, A new electric, 47
Lamp, An enclosed cadmium vapour arc, 128
Lamps, gas-filled tungsten glow, 66
Lantern slides, Sulphide toning for, 104
Lassen Peak, California, The recent activity of, 186
Lavas in Mull, Pillow, 10
Lead from radio-active minerals, 100
Leech removed from nasal cavity of a soldier from the Dardanelles, 86
Legend of the young cuckoo, 150
Lens and drop method of measuring refractive index, 13
——, Enlarging without a, 223
Life-forms, On the theoretical possibility of producing living, 189
Light by metals, The reflection by ultra-violet, 13
—— by rubbing, Production of, 13
—— filter, Bromine as a, 188
——, The character of vibrations emitted by sources of, 167
—— to engineering, Application of polarised, 224
Lightning danger of trees, 200
——, Nature and cause of ball, 220
Line-dividing instrument, A simple, 68
Ling, Philip H., 29
Liner and in the church tower, The master clock on the, 49
Lithosphere, The influence of jointing in the degradation of the, 219
Locust storm, A, 136
Locusts with a virus, Infection of, 168
Longitudes, The first accurate determination of, 80

McCOLL, H. E., 231
Magnetic hand, The, 167
Main, Hugh, 226
Man, Fowl mite attacking, 189
Man's progress, The bearing of early stone implements on the stages of, 153
—— welfare, Mendelism and, 189
Marching by stars, Night, 163
Markham, Sir Clements, 81
Marriott, R. A., 153
——, William, 10, 41, 60, 82, 102, 123, 143, 164, 186, 200, 220, 237
Mars, 8, 99, 120, 142
Mason bee (*Chalicodoma muraria*), Nest of the, 42
Maxwell, J. E., 131
Medal of the R.A.S., The gold, 58
Mediterranean, The winter climate of the Eastern, 82
Men on the Moon, The first, 131
Mendelism and man's welfare, 189
Mesopotamia, The geology of, 143
Metals, The reflection of ultra-violet light by, 13
Meteor shower from Winnecke's Comet, A, 198
Meteoric showers, The principal, 38
Meteorological service, Canadian, 201
—— observations in the Persian Gulf, 10
—— Society, Scottish, 63
Meteorology Notes, 10, 41, 60, 82, 102, 123, 143, 164, 186, 200, 220, 237
—— of the globe in 1911, The, 123
Micrometer for detecting proper motions, The Blink, 185
Micro-organisms, Fossil, 40
Microscopical Club, The Quekett, 45, 64, 84, 220
—— examination of rock sections, On a new method for the, 82
—— Society, The Royal, 63, 147
Microscopy Notes, 11, 42, 63, 82, 103, 124, 144, 165, 187, 201, 220, 238
Migration of fishes, Physiology of, 130
—— of salmon, Autumn, 108
Migrations of mullets, Erratic, 168
Mira Ceti, 199
Mitchell, C. Ainsworth, 8, 40, 59, 80, 99, 121, 142, 162, 185, 199, 218, 236
Mite attacking man, Fowl, 189
Mole, Position of Cape Golden, 225
Molecules and the formation of H_3, The ionisation and dissociation of hydrogen, 149
——, Reflexion of gas, 12
Mongooses, Uses of odoriferous glands in, 242
Moon, The first men on the, 131
Motion known, The largest proper, 162
Motions, The Blink micrometer for detecting proper, 185
